

Question 21: Batch File Execution

CODE / COMMANDS

```
notepad test.bat
@echo off
echo Hello, this is a sample batch file
echo Running network check...
pause
test.bat
```

OUTPUT SCREENSHOT

The screenshot shows a terminal window titled "OUTPUT - Experiment 21". The terminal displays the commands and output of a batch file execution. The commands entered are `notepad test.bat` and `test.bat`. The output of the batch file is displayed, showing the messages "Hello, this is a sample batch file" and "Running network check...", followed by a pause and the prompt "Press any key to continue . . .".

```
C:\Users\Student> notepad test.bat
-- test.bat --
@echo off
echo Hello, this is a sample batch file
echo Running network check...
pause
-- end of file --
C:\Users\Student> test.bat
Hello, this is a sample batch file
Running network check...
Press any key to continue . . .
```
